Bullet-Resistant Glass

BullProt™ is a glass clad polycarbonate bullet-resistant glass specially constructed to defeat the various ballistic threat levels from small firearms to NATO Armor Piercing Rifle.

BullProt™ offers total protection at minimum weight and thickness for easy handling and installation. This anti-ballistic solution also minimized unnecessary maintenance other than the routine day to day maintenance operation carried out on glass. It keeps the outlook of your intended glass window or opening and it does not gets puncture or easily scratch as with films.

BullProt™ complies to US and International Standards. The developed glazings meet or exceed different levels of the ballistic codes of UL-752, NIJ-0108.01, HPW-TP-0500.02 or equivalent EN1063, DIN52290, BS5051, GA165, GOST R50963-96 and AS2343 standards.

It is important for the end-user to realize that a complete bullet-resistant glazing system requires **BullProt™**, correct frames and proper anchorage to supporting structures in order to be functionally effective.

<i>Product Code</i>	<i>Ballistic Standard</i>	<i>Weapon & Ammunition</i>	<i>Impact Pattern</i>	<i>Glass Thickness</i>
BullProt-I	UL-I; NIJ I	9mm Luger, 124 gr, FMJ	3 shots 10cm triangle	21mm
